

Autodeals Electronic Signature (E-Sign) & Electronic Sending (E-Send) Upgrade

This release delivers a major upgrade to the Autodeals E-Sign and E-Send systems, providing a more modern, secure, responsive, and professional electronic document experience for dealerships, lenders, and customers.

■ New Email-Based Send Process

- Direct Email Send button replaces older cut-and-paste URL workflows.
- Cleaner and faster package delivery for staff and customers.
- Improves usability and reduces delivery mistakes.

■ Fully Responsive Mobile-Friendly Interface

- Optimized for desktop, tablets, iPhones, and Android devices.
- Modern responsive layouts improve readability and navigation.
- Cleaner visual presentation across all screen sizes.

■ Simplified Signing Experience

- Fewer steps required to complete document signing.
- Improved instructions and workflow guidance.
- No unnecessary windows opening during the signing process.

■ Improved Form Access & Usability

- Forms are easier to access and review.
- Improved document organization and readability.
- Better customer-facing workflow experience.

■ Enhanced Form Processing & Automation

- Improved checkbox processing and dynamic form edits.
- Enhanced auto-completion of agreement information.
- Reduced manual corrections and improved workflow reliability.
- More accurate preparation of lender and customer forms.

■ Stronger Security & Verification

- More secure access to document packages.
- Improved validation and verification controls.
- Additional error checking throughout the signing workflow.

■ Improved Reliability & Stability

- Resolved a key issue affecting signing workflow reliability.
- Process is now more deterministic and less prone to interruption.
- Reduced risk of signing failures and workflow breakdowns.

■ More Professional Presentation

- Cleaner layouts and improved readability.
- More polished and professional customer-facing views.
- Improved consistency across the E-Sign and E-Send systems.

■ Enhanced Confirmation & Agreement Tracking

- Additional agreement confirmation details displayed during signing.
- Improves transparency and customer acknowledgment.
- Helps reduce the risk of repudiation disputes.

Result: This upgrade significantly improves the usability, automation, reliability, security, and professionalism of the Autodeals electronic document workflow.
