

Autodeals V3.0 Rental Software

Autodeals is proud to introduce Version 3.0 of our Rental Software — a major evolution designed to give independent dealerships complete control over modern rental operations from reservation and customer management to electronic signing, payment collections, and accounting integration.

This is more than a software update. Autodeals V3.0 delivers a fully integrated rental platform that connects your inventory, CRM, customer communication, payment processing, and operational workflow into one unified system.

Fully Integrated Rental Workflow

Manage the entire rental lifecycle inside a single platform. Track reservations, agreements, pickups, returns, inspections, fees, payments, and customer communication without switching between multiple systems.

Supports Cars, Trailers & Equipment

Autodeals V3.0 was designed for flexible inventory management, allowing dealerships to manage traditional vehicle rentals, utility trailers, enclosed trailers, equipment rentals, and specialty inventory from one centralized dashboard.

Integrated CRM & Customer Management

Customer information, communication history, notes, follow-ups, and rental history are integrated directly into the CRM platform, helping staff deliver a more professional and organized customer experience.

Stripe Payment Collections Built-In

Integrated Stripe payment collections allow dealerships to securely collect deposits, payments, balances, and authorization holds directly through the rental workflow.

Electronic Signing & Messaging

Optional E-Sign and Messaging services provide a streamlined digital rental experience. Send agreements electronically, collect signatures remotely, and communicate with customers through integrated text and email workflows.

Integrated Accounting

When enabled, the accounting module integrates rental transactions directly into your dealership's financial workflow, reducing duplicate entry and improving operational efficiency.

Advanced Fee & Pricing Engine

Configure flexible rental pricing structures, recurring charges, fees, late return penalties, taxes, protection plans, mileage calculations, and custom rental rules.

Key Benefits of Autodeals Rental V3.0

- Unified rental management system
- Professional customer experience
- Improved workflow automation
- Integrated payments and collections
- Reduced manual data entry
- Enhanced digital document management
- Modern responsive mobile-friendly interface
- Scalable support for multiple rental categories
